

memory::notEQ

```
graph LR; A[memory::get_parameter_alignment] --> B[memory::notEQ];
```

A diagram showing a call to the function `memory::get_parameter_alignment` leading to the `memory::notEQ` state. The function call is in a white box on the right, and the state is in a gray box on the left. A blue arrow points from the function call box to the state box.

memory::get_parameter
