

allocation::check_proxies

```
graph LR; A[allocation::check_proxies] --> B[library_manager::get_library_name]
```

A diagram showing a call from the function `allocation::check_proxies` to the function `library_manager::get_library_name`. The first function is in a gray box, and the second is in a white box. A blue arrow points from the first box to the second.

library_manager::get
_library_name
