

memory_symbol::get
_address_string

```
graph LR; A[memory_symbol::get_address_string] --> B[convert_to_binary]
```

A diagram showing a call from the function `memory_symbol::get_address_string` to the function `convert_to_binary`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

convert_to_binary
