

memory::is_sds_var

```
graph LR; A[memory::get_source_values] --> B[memory::is_sds_var];
```

A diagram showing a call to the function `memory::is_sds_var`. A blue arrow points from the function `memory::get_source_values` to the function `memory::is_sds_var`. The box containing `memory::is_sds_var` is shaded gray, while the box containing `memory::get_source_values` is white.

memory::get_source
