_flows/non_deterministic  
_flows.cpp"] --> C;
```

This diagram illustrates a file dependency structure. At the top is a header file, `_flows.hpp`, located at `/home/osboxes/bambu/PandA-bambu/src/design`. Below it are two source files: `design_flow_factory.cpp` on the left and `_flows.cpp` on the right, both located at the same directory. Blue arrows point from each source file to the header file, indicating that both source files include this header.
